1. ORGANISATION OVERVIEW

Name: Anatomy, A Panel Beaters (Pty) Ltd

Brief History

Anatomy, A Panel Beaters was established in 2008 in Johannesburg, South Africa. Starting as a small family-owned workshop with three employees, the business has grown into a mid-sized auto body repair centre employing 18 staff members. The company specialises in collision repair, dent removal, spray painting, and chassis alignment for private vehicle owners and insurance companies.

Mission Statement

"To restore every vehicle to pre-accident condition with precision craftsmanship, transparent pricing, and exceptional customer care."

Vision Statement

"To become the most trusted panel beating brand in Gauteng by 2030 through innovation, quality, and customer-centric service."

Target Audience

- Private vehicle owners (ages 25-65)
- Insurance assessors and brokers
- Fleet management companies
- Second-hand car dealerships requiring pre-sale cosmetic repairs

2. WEBSITE GOALS AND OBJECTIVES

Goals

- Increase quote requests by 40% within six months of launch.
- Establish credibility and showcase before/after repair galleries.
- Reduce inbound phone queries by providing self-service information.
- Generate B2B leads from insurance and fleet partners.

Key Performance Indicators (KPIs)

- Monthly quote form submissions (target: 50+).
- Average session duration >2 minutes.
- Bounce rate <45%.
- Organic search traffic growth of 25% quarter-on-quarter.
- Conversion rate from visit to enquiry >3%.

3. CURRENT WEBSITE ANALYSIS

Strengths

- Domain name is simple and brand-aligned.
- Basic contact information is accurate.

Weaknesses

- Non-responsive design; poor mobile experience.
- No online quote request functionality.
- Missing SEO optimisation; does not rank for "panel beaters near me."
- No customer testimonials or case studies.
- No integration with Google Maps or business listings.

Areas for Improvement

- Implement mobile-first responsive design.
- Add an interactive quote request form with image upload.
- Integrate customer reviews and a photo gallery.
- Optimise for local SEO with structured data.

4. PROPOSED WEBSITE FEATURES AND FUNCTIONALITY

Essential Pages & Features

- Homepage: Hero banner with trust signals, quick quote CTA, and service highlights.
- About Us: Company history, team profiles, and workshop facility photos.
- Services: Detailed pages for collision repair, spray painting, dent removal, haildamage, and chassis alignment.
- Gallery: Filterable before/after image gallery with high-resolution photos.
- Get a Quote: Multi-step form allowing users to upload accident photos and receive anestimated quote.
- Testimonials: Customer reviews with star ratings and video testimonials.
- Contact Us: Embedded Google Map, contact form, operating hours, and click-to-callbuttons.
- Blog/FAQ: Articles on insurance claims processes and maintenance tips.

Functionality

- Image compression and upload handling.
- Email notification system for new quote requests.
- WhatsApp Business API integration for instant chat.
- Cookie consent and POPIA compliance.

5. DESIGN AND USER EXPERIENCE

Colour Scheme

- Primary: Deep Navy Blue (#1B3A5C) - conveys trust and professionalism.
- Secondary: Metallic Silver (#C0C0C0) - reflects the automotive industry.
- Accent: Safety Orange (#FF6B35) - for CTAs and urgent elements.
- Background: Clean White (#FFFFFF) with Light Grey (#F5F5F5) sections.

Typography

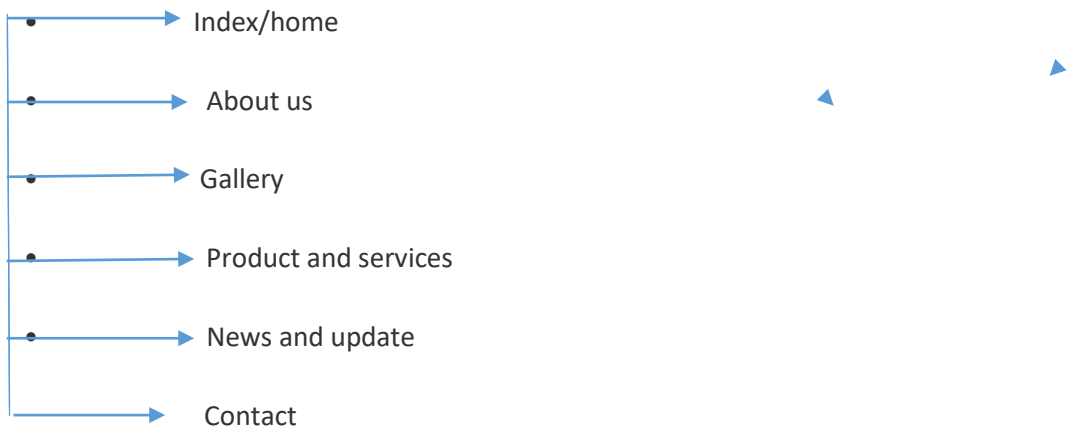

- Headings: Montserrat Bold (hierarchy: 32px, 24px, 18px).
- Body: Open Sans Regular (16px for readability).
- Accent/CTAs: Montserrat Semi-Bold, uppercase for buttons.

Layout and Design Approach

Clean, industrial-modern aesthetic with ample white space. Card-based layout for services and gallery items. Sticky navigation bar with prominent "Get a Quote" button. Trust badges (RMI accredited, insurance approved) displayed above the fold.

User Experience Considerations

- Mobile-first design; thumb-friendly navigation.
- Clear visual hierarchy guiding users toward quote submission.
- Fast-loading images with lazy loading.
- Accessible colour contrast (WCAG AA compliant)

Low-Fidelity Wireframes

- Homepage: Header -> Hero (CTA) -> Services Grid -> Gallery Preview ->Testimonials -> Footer.
- Quote Page: Vehicle Details -> Damage Description -> Photo Upload -> Contact Info-> Confirmation.

6. TECHNICAL REQUIREMENTS

Hosting & Domain

- Domain: precisionpanelbeaters.co.za (existing domain retained).
- Hosting: Shared cloud hosting (HostAfrica or Xneelo) with SSL certificate.
- CDN: Cloudflare for image caching and DDoS protection.

Programming Languages & Frameworks

- Frontend: HTML5, CSS3 (Tailwind CSS), JavaScript (Vanilla + Alpine.js).
- Backend: PHP (Laravel) or Node.js for form handling and admin dashboard.
- Database: MySQL for storing quote submissions and gallery metadata.
- CMS: WordPress with custom theme or headless CMS (Strapi) for easy contentupdates.

Additional Tools

- Google Analytics 4 and Google Search Console.
- Yoast SEO or RankMath plugin.
- WhatsApp Business chat widget.

1. ORGANISATION OVERVIEW

Name: UrbanNest Apartment Rentals

Brief History

UrbanNest was founded in 2015 in Cape Town, South Africa, as a boutique property management agency specialising in medium- to long-term apartment rentals. The company manages 120+ units across the Atlantic Seaboard and City Bowl, catering to young professionals, expatriates, and corporate relocations. UrbanNest differentiates itself through fully furnished, design-forward apartments and a seamless digital-first rental experience.

Mission Statement

"To redefine urban living by offering beautifully designed, hassle-free apartments that feel like home from day one."

Vision Statement

"To become Cape Town's leading tech-enabled rental platform, expanding to 500 managed units by 2028."

Target Audience

- Young professionals (ages 25-40) seeking furnished rentals.
- Corporate HR managers organising employee relocations.
- Expatriates and digital nomads (international market).
- Local tenants looking for premium, maintenance-free living.

2. WEBSITE GOALS AND OBJECTIVES

Goals

- Increase qualified viewing bookings by 60% within four months.
- Reduce vacancy periods by enabling instant online applications.
- Build brand authority in the premium rental market.
- Automate tenant screening and lease documentation workflows.

Key Performance Indicators (KPIs)

- Monthly viewing bookings via website (target: 80+).
- Average time on property pages >3 minutes.
- Online application completion rate >35%.
- Email subscriber growth of 20% per quarter.
- Cost per lead below R 150.

3. CURRENT WEBSITE ANALYSIS

Strengths

- Professional photography of select properties.
- Active Instagram integration driving traffic.

Weaknesses

- No real-time availability calendar; listings often outdated.
- Manual enquiry process; no online booking system.
- Poor search/filter functionality (only basic location filter).
- No tenant portal for maintenance requests or rent payments.
- Slow page load times due to uncompressed images.
- Not optimised for international SEO (expat market).

Areas for Improvement

- Implement dynamic property listings with availability status.
- Add advanced search filters (price, bedrooms, amenities, pet-friendly).
- Integrate online viewing bookings and application forms.
- Build a tenant portal for post-lease management.
- Compress images and implement lazy loading.

4. PROPOSED WEBSITE FEATURES AND FUNCTIONALITY

Essential Pages & Features

- Homepage: Hero video of Cape Town apartments, search bar, featured listings, andneighbourhood guides.
- Apartments: Grid/list view with advanced filters (price range, bedrooms, move-indate, amenities, pet policy).
- Property Detail Page: Image gallery (lightbox), 360 virtual tour embed, floor plans,neighbourhood map, and "Book a Viewing" CTA.
- Neighbourhood Guides: Content-rich pages for Sea Point, Green Point, City Bowl, etc.
- Book a Viewing: Calendar integration allowing tenants to select available time slots.
- Online Application: Digital form with ID upload, proof of income, credit check consent,and digital signature.
- Tenant Portal: Secure login for rent payments, maintenance requests, leasedocuments, and renewal.
- Landlord Services: Information for property owners wanting to list with UrbanNest.
- Blog: Articles on "Moving to Cape Town," rental tips, and neighbourhood spotlights.

Functionality

- Real-time availability sync with property management software.
- Automated email confirmations for bookings and applications.
- Stripe/PayFast integration for rent payments and holding deposits.
- Multi-language support (English and German for expat market).
- POPIA-compliant data handling and secure document storage.

5. DESIGN AND USER EXPERIENCE

Colour Scheme

- Primary: Charcoal Black (#2D2D2D) - sophistication and modern urban living.
- Secondary: Warm Sand (#E8DCC4) - evokes comfort and home.
- Accent: Terracotta (#E07A5F) - warmth and action for CTAs.
- Background: Off-White (#FAF9F6) with soft grey dividers.

Typography

- Headings: Playfair Display (elegant, editorial feel; sizes: 48px, 32px, 24px).
- Body: Inter (clean, highly legible; 16px body, 14px captions).
- UI/Labels: Inter Medium, uppercase tracking for buttons and tags.

Layout and Design Approach

Editorial, magazine-style layout with large hero imagery. Asymmetric grids for property listings to create visual interest. Sticky property search bar that remains accessible while scrolling. Minimalist navigation to keep focus on imagery and listings.

User Experience Considerations

- Intuitive search-first experience; users can search before scrolling.
- Mobile-optimised image galleries with swipe gestures.
- Progressive disclosure: advanced filters hidden behind "More Filters" to reducecognitive load.
- Clear trust signals (secure payments, verified listings, tenant reviews).
- Fast checkout-style application flow to reduce abandonment.

Low-Fidelity Wireframes

- Homepage: Full-width Search Bar -> Featured Listings (3-col grid) -> NeighbourhoodCards -> Testimonials -> Newsletter -> Footer.
- Property Page: Image Gallery -> Key Details Bar -> Description -> Amenities List ->Map -> Sticky "Book Viewing" Sidebar.
- Application Flow: Select Property -> Personal Details -> Employment & Income ->Documents -> Review & Submit.

6. TECHNICAL REQUIREMENTS

Hosting & Domain

- Domain: urbannest.co.za (primary) and urbannest.com (international redirect).
- Hosting: VPS or managed cloud hosting (AWS Lightsail or DigitalOcean) for scalability.
- SSL: Let's Encrypt or premium SSL for payment security.
- CDN: Cloudflare or BunnyCDN for global image delivery.

Programming Languages & Frameworks

- Frontend: React.js or Next.js (SSR for SEO), Tailwind CSS, Framer Motion foranimations.
- Backend: Node.js (Express) or Python (Django REST Framework).
- Database: PostgreSQL for relational data; Redis for caching search queries.
- CMS/Headless: Strapi or Contentful for blog and neighbourhood content.
- PMS Integration: API connection to PropTech software (e.g., PropertyTree or customsystem).

Additional Tools

- Google Analytics 4, Hotjar for heatmaps, and Google Tag Manager.
- Calendly or custom booking widget for viewings.
- PayFast and Stripe payment gateways.
- Mailchimp or SendGrid for automated email workflows.
